

Introduction to Guitar Tab

Guitar tab is used to write down music played on the guitar. It is made of 6 horizontal lines showing the guitar strings, and numbers showing which fret notes are to be played on.

Zero indicates that a note is played on an open string (no finger)

Numbers show which fret the note is played on

Notes (numbers) are played in a sequence from left to right, when notes (numbers) are in a vertical line then they are played together making a chord.
